

How to setup Colorify Shader for Mini Legion Handpainted units

1. Purchase and Download Colorify Shader first.(It is 25 USD and it is worth the price!)

<https://assetstore.unity.com/packages/vfx/shaders/colorify-21177>

2. Locate “Colorify/Mask(baked)/1 color/Unlit/Texture” shader and apply it to Mini Legion units.

3. After that, you can apply ColorifyBase.png to Base slot, and ColorifyMask.png to Mask slot. Just like the image below.

4. Finally, pattern color should be bright grey(R:223, G:223, B:223) and new color should be whatever color you want.
